

1. As the president of the football club of Sveti Nikole, Ovce Pole, can you please introduce the club itself and tell us something more about it, for example when it was founded, where the training takes place, etc.?

-So let me briefly introduce myself, I am Mile Kostov, president of the Ovche Pole Football Club from Sveti Nikole. FC Ovche Pole is a club with tradition and has existed since 1925, next year is our jubilee because we will celebrate a century of existence. Over the years, FC Ovce Pole has successfully participated in higher-level competitions. Currently, in the senior competition, we compete in the third-ranked competition at the state level and are "under the umbrella" of the Football Federation of Macedonia (FFM). While in the youth categories, we participate in several regional leagues, in different categories and generations. From the beginning until today, training and competitions have taken place at the City Stadium in Saint Nikole, a stadium where many athletes and personalities represent the city and the municipality in the country and beyond. The colors of our club are the colors of Ovchepolieto, yellow-green.

The club flag

Ovce Pole

2. How much are the young people interested in sports? What would be your message to the young people?

-In reality, young people are playing less and less sports lately and are more focused on computers and video games. An appeal to schools and institutions, to guide children from an early age through various presentations and events, where and how to spend their energy, because playing sports is life. Let my message to young people be the well-known motto "In a healthy body, a healthy spirit" because, in this dynamic time, the psychophysical condition is the most important. Thank you.
